

INTEGRATED

PROCESS SYSTEMS

WHO WE ARE

Experienced Engineers and Builders

Our multidisciplinary teams deliver end-to-end personalized, integrated process solutions to the Bio-pharma, Food, Consumer Product and Nuclear industries.

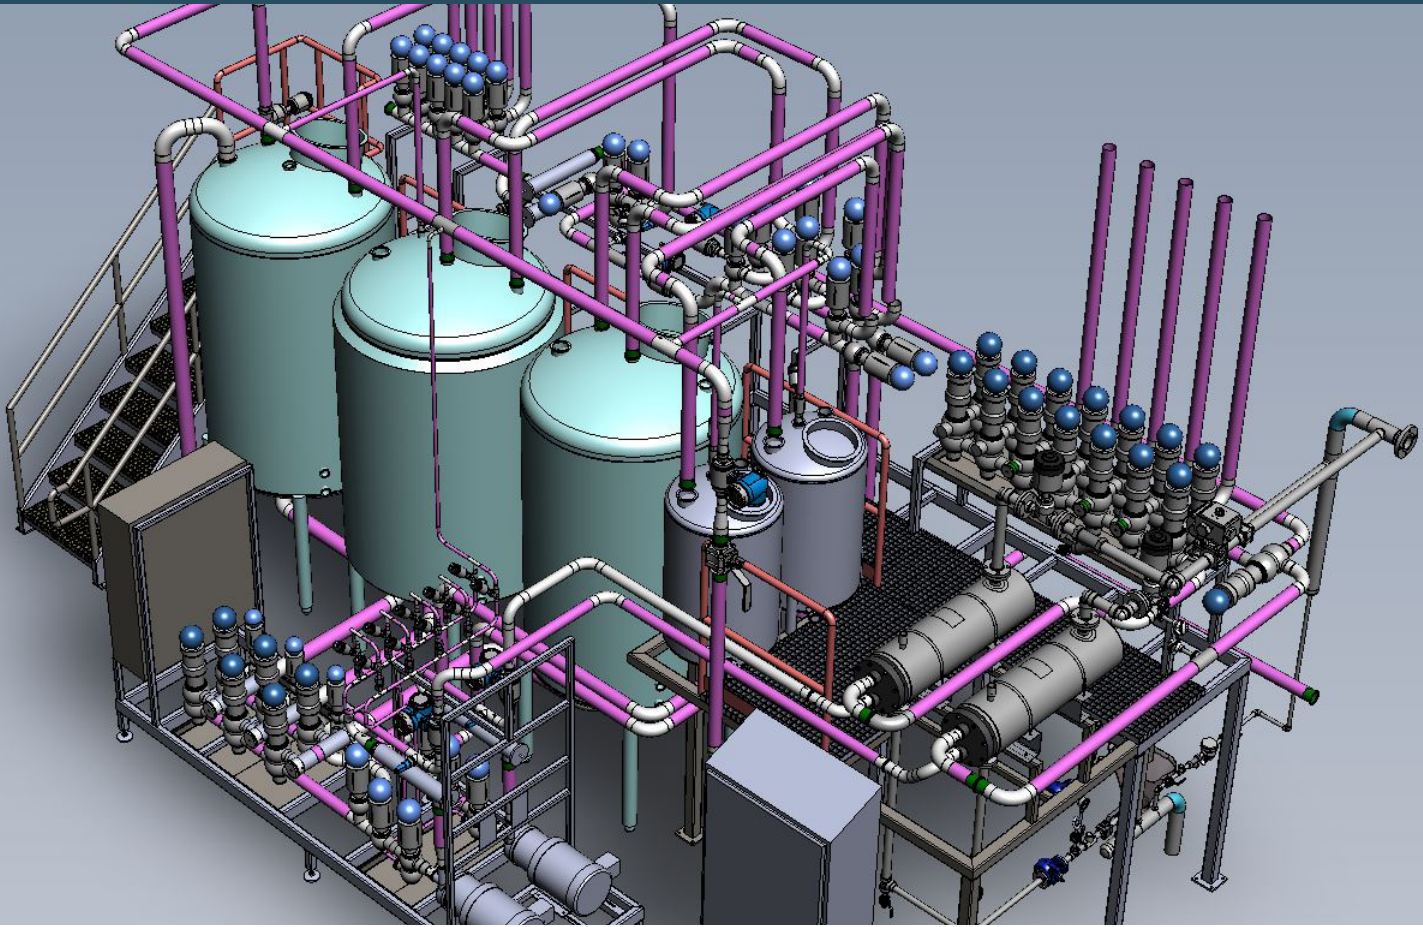

We are:

- Process Lead
- Quality Driven
- Customer Focused

BFC Technical Staffing Profile

-  Engineering
-  Skilled Trades

WHAT WE DO

Engineering

Assembly

Commissioning

We design and build custom process equipment. We invest in engineering to better understand our clients' process needs. Project managers, engineers, quality technicians and skilled trades work and collaborate at our 55,000 SF facility. This model is fundamental to delivering complex projects on time and on budget.

Our Experience

- Process Engineering
- Bio-reactors
- Super-skids
- MF / UF Systems
- CIP Systems
- Sterile Process
- WFI / USP Distribution
- Installation
- SAT Commissioning
- Non-Newtonian Fluids
- High Viscosity Fluids
- Ointments and Creams
- High-Acid / Low-Acid Products
- HTST systems
- Continuous Processing
- High Pressure (27 MPa) / High Temp (650°C)
- Heat Decontamination Systems

COLLABORATIVE

HOW WE DO IT

We deliver on our commitments.

Our collaborative working style brings multidisciplinary thinking to each project. An integrated team works on the project from beginning to end, streamlining the design-build process and delivering a quality system in a shorter amount of time.

We excel at delivering complex process skids.

Our teams thrive on a challenge. We leverage our in-house expertise to find optimal solutions for complex processes. We provide a single point of accountability to simplify workflow and optimize efficiency.

DESIGN-BUILD APPROACH

WE VALUE:

- Project success over individual achievement
- Long-term client satisfaction over short-term profit
- Integrity, respect and life balance
